

THE CHRONICLE

VOL. XIII. No. 16.

CROSSFIELD, ALBERTA, THURSDAY, MAY 20th, 1920.

PRICE \$1.50 A YEAR.

WM. LAUT

Get Full Earning Power from Farm Machinery

What Means Most to You is What We Try Most to Give

There is only one way to buy an implement economically.

Buy it on the basis of its earning power.

Buy it for its ability to do good work for you right from the start and year after year.

It is our aim to sell full earning power every time we sell a farm implement.

That is why we buy from a firm that takes every care to maintain its reputation for making only good implements,

—why we show you the implements before you buy so that you can be sure it fits your requirements,

—why we set the implement up exactly right before we turn it over to you,

—why we are always ready to help you understand every adjustment before you start operating the implement,

—why we maintain a prompt repair service so that when parts become worn, you can renew them without loss of time,

All of those things go to insure full earning power. Yet their great importance is sometimes overlooked. You will appreciate the care we take in observing them.

Come in and see us whenever you need a farm implement.

William Laut,
Groceries, Hardware, Implements, Harness.

VALUABLE DOCUMENTS

Bonds, insurance policies and other valuable documents should not be kept at home where they are likely to be lost or mislaid.

The Safety Deposit Boxes of this Bank provide at a moderate cost an excellent means of keeping valuable papers.

Mr. Valiquette at Crossfield every Saturday.

Local and General

Mrs. Young, of Macleod, daughter of Mr. and Mrs. McRory was a visitor under the parental roof the past week-end, returning to her home on Tuesday afternoon.

Mrs. A. J. Wilson who has been staying with Mr. and Mrs. Cavan- der for some time, returned to her home in Calgary, on Monday last.

Operations were commenced on Wednesday on the new office premises for the Rossford Municipality to be erected on the old Stuart Lumber Co. site which the Municipality purchased some time ago. Mr. H. Johnson being in charge of the job.

Any person desiring a garden plot in the Park, kindly notify D. Onkes, by Monday, May 24th.

Mr. Hayes, of Keoma, was a visitor in town on Tuesday. He informed us that he was planting fifty acres with sunflowers and will erect a silo, making use of the sunflowers for ensilage. He claims that sunflowers have many advantages, they will stand more frost than grain, will bear up under hail, and have great value for dairy cattle.

Private Funds to Lend.—D. P. Hays, Carstairs.

Mr. S. Willis, Musical Director.

Mrs. M. Thomas, Organist.

Mr. D. A. Jeffery, Sunday School Superintendent.

Sunday School & Bible Class 2 p.m.

Preaching Service at 7.30 p.m.

FOR SALE—White Faced heifer,

"Willow Springs Perfection."

Apply Wm. Urquhart,

Crossfield, Alta.

Mr. A. W. Gordon was a business visitor to Calgary on Tuesday.

Mr. C. McAdams who for some time has been employed in the store of Halliday and Co. left town on Wednesday morning for Calgary, where he will spend a few days prior to leaving for the north, where we understand he has a section of land in the vicinity of Meenook, east of Edmonton. We sure wish Charlie every success wherever he goes as he was a very sociable and well respected citizen whilst amongst us here in Crossfield.

Cattle buyers are meeting with very little success in this locality of late, we noticed one very despondent cattle man shipping seven head on Tuesday, remarking that this was the smallest shipment he had made in his career.

Mr. C. L. Skinner who was recently with Mr. G. H. Burke at the Sampson Store and Post Office is coming to work in the Halliday and Co. store in town as successor to Mr. C. McAdams. We understand Mr. Skinner is to be in the local baseball line-up, he being a player of some repute.

ROYAL YEAST CAKES

Royal Yeast
has been the
standard yeast
in Canada for
over 50 years, and it
is a well known fact
that bread made
with Royal Yeast
possesses a greater
amount of nourish-
ment than that
made with any
other.

Clean Up!

Around about this time of the year it is customary for the housewife to indulge in her annual spring housecleaning. It has become the usual procedure, too, for the provincial and municipal fire prevention and health authorities to declare "Clean-up" days or weeks. The object is, of course, to focus public attention upon the importance of organized community as well as individual effort being devoted to the task of collecting and destroying the refuse and rubbish which always accumulates around the houses and other buildings during the severe winter months.

It is important that this work be attended to for many reasons. First, there is the question of health to be considered. The accumulation of dirt, filth and waste material of various kinds develop from such accumulations, but flies, the greatest of all carriers of disease, find their chief breeding places in filth and rubbish. A general spring clean-up is one of the best health measures that can be taken in any home or community.

The removal of the dust and dirt resulting from the sealing up of houses and offices during the cold winter months is also a protective measure from moths and insects whose destructive activities are too well known to even require mention.

A general spring clean-up is important also from the standpoint of fire protection. Many people who exercise care in regard to the accumulation of filth and rubbish which might have an adverse effect on health, and as the breeding places of germs and insects of many kinds, neglect to collect and remove other kinds of rubbish which, while not dangerous from these standpoints, are the cause of fires which, all too frequently, result in serious conflagrations with consequent loss of valuable property and even more valuable lives.

"Clean-up" days or weeks have become established institutions in the cities and larger towns, and the municipal authorities co-operate with the individual citizen in city-wide and town-wide house-cleaning. The public health is thereby promoted, a larger measure of security from fire is provided, and the whole community made much neater and more attractive, leading inevitably to greater civic pride and to the carrying out of other improvements, such as painting, lay-

ing out lawns and gardens, and general home and civic betterment.

Although such organized co-operation is not possible in the rural portions of the West, it is none the less insisted that the same work should be carried out on a voluntary basis. The united efforts of members of the family and the hired help directed to a general farm cleanup, not only around the home but also in the outlying areas, will help to keep accumulated rubbish "not only improve the appearance of the place, but it may easily be the direct cause of preventing sickness and loss by fire. The fire loss annually is simply stupendous in the United States, the capita of any country in the world. It amounts, on an average, to over \$25,000 a year, or at the rate of \$68,000 a day. According to statistics of the National Association of Fire Underwriters, 62 percent of all fires start from preventable causes, while fires of unknown origin are, it is believed, also largely from preventable causes. This heavy fire loss is the cause of the very high and extremely heavy premiums for fire insurance, those who innocent people who take all possible precautions are made to suffer loss because of the

Addressing a recent meeting of the Canadian National Safety League, one speaker declared that experience has shown that cleanliness about any institution would do more to prevent fires than any other one thing. The "rubbish habit," he declared, was a source of constant danger.

Safety First: An ounce of prevention is worth a pound of cure; it is better to be sure than sorry—all of these old adages and scores of others of like import apply to the question of a general spring clean-up and the removal of rubbish and waste of every kind. It is not a question of whether to allow it to accumulate, but under certain conditions this is not wholly possible during the winter. There should, however, in their own individual and even selfish interests be a general response by all people to the proclamations issued by the provincial governments of the West for the purpose of making it necessary to wait until that date, by individual and community housecleaning should not be deferred beyond it.

A SMILE IN EVERY DOSE OF BABY'S OWN TABLETS

Baby's Own Tablets are a regular joy giver to the little ones — they never fail to make the cross baby happy. When baby is cross and irritable the mother may be sure something is ailing. Baby's Own Tablets are nature to be cross unless he is ailing. Mothers, if your baby is cross; if he cries a great deal and needs your constant attention day and night, give him Baby's Own Tablets. They are a mild but thorough laxative, which will quickly regulate the bowels and stomach and thus relieve constipation and indigestion, colds and coughs. When baby is happy — there surely is a smile in every dose of the Tablets. Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from J. C. Williams Medicine Co., Brockville, Ont.

Saskatchewan Sells Bonds

The Saskatchewan government has just effected a sale of one million dollars of four year six percent Saskatchewan bonds at 102.20, or a net cost to the province at the rate of 5.37 percent, it was announced by the Hon. Charles A. Dunning, provincial treasurer.

Conscience Money

The Chancellor of the Exchequer of the United Kingdom publicly acknowledges the receipt of fifty pounds conscience money from S.O.S. It is a big amount in the circumstances, but doubtless is as a grain of sand on the beach to what is owed the government by individuals whose consciences do not worry them, at least to the extent of compelling a disgorgement. S. O. S. is a lonely fellow. Or is it a she?—Montreal Gazette.

**HEART SO BAD
WAS NOT SAFE TO
LEAVE HER ALONE**

Miss Eva P. Yateman, Krugersdorf, Ont., writes: "I feel that I must write and tell you of the benefit I have derived from Milburn's Heart and Nerve Pills. About four years ago I became afflicted with palpitation of the heart, nerves and fainting spells, and was down in bed for about six weeks. I consulted several of the best doctors and seemed to get better, although the fainting spells would still trouble me. I would take such terrible falls, with no warning, that I was not able to leave my bed at home at any time. At last I decided to try your Heart and Nerve Pills, and took several different kinds, but they seemed to have no effect. When I received the advertisement of Milburn's Heart and Nerve Pills I decided to try them. I bought two boxes. I have taken one every day, and feel much better. I am now helping me. I have taken about twenty boxes, and feel much better. I have terrible spells. I sincerely feel that your medicine has proved a blessing to me. I feel that I am now able to go with my heart to try them, as I am confident they will find relief."

Parasites as Exterminators

Development of internal parasites which will ultimately exterminate the grasshopper, is being carried on at the University of Saskatchewan by Dr. A. E. Cameron, Dominion entomologist. The scientist says that ordinary methods must again be used this year but hopes that development of the parasite will be sufficient in 1921 to prevent any further grasshopper plague.

Minard's Liniment, Lumberman's Friend.

Care of the Battery

Why Distilled Water is Always Used For Batteries

A good deal of ignorance is abroad as to why nothing but distilled water should be used in storage cells, says the Motor Annual of Popular Science Monthly. All but distilled water contains mineral matter in solution, and this mineral matter is the quality that, as the water evaporates the mineral matter is left behind and all that ever enters the cell remains there. It is obvious, therefore, that the amount of mineral matter in solution is of considerable importance. Very soon after concentration becomes such that the mineral salts are deposited on the plates of the cells. Electrolytic action then begins between the salts and the plates, the framework of the plates is eaten away and the life of the cell is shortened. The same is true in the process, too, is considerable.

Some people have the idea that boiling water helps, but boiled water is worse than unboiled, for the concentration of mineral matter in solution is increased. The only way to avoid the use of any but pure distilled water in filling storage cells.

Storage for Coal

Sheds with a storage capacity of 10,000 tons, to be extended to handle 20,000 tons, have been secured in Winnipeg to store coal shipped from Drumheller, Alta. This is the first time coal from the Drumheller mine has been stored in that city.

Binding Power of The British Throne

It is Because of the Republic Spirit
That British Monarchy
Stands Firmly
Western Australia Mail.—The British
Empire, or, as it is of late more
commonly called, the British Commonwealth
of Nations, could not
well exist without the nexus of a common
throne. This crowned republic,
as it is to continue as a political entity
cannot co-exist with the institution
of the monarchy, which is the
axis round which all our governmental
machinery so smoothly revolves.
The sovereign people are not more
sovereign in the British Empire
and in the self-governing Dominions
The American president may, and
does on occasions, exercise an auto-
cratic power which no occupant of the
British throne could ever attempt
and it is because of the republic spirit
which pervades British political in-
stitutions that the British monarchy
stands firmly. It is a paradox, but
this no doubt, but a paradox which
exactly expresses the truth.

Ask for Minard's and take no other.

Sheep Ranchers For B. C.

The owners of an area totalling 160,000 acres in the Coteau, Francoeur and Stuart Lakes districts, in E. C. Canada, have sold out to a party of 12 private farmers who will run sheep there. A Manitoba rancher has bought 3,200 acres near Stuart Lake and taken an option on 5,000 additional acres, while a Victoria resident recently bought 2,040 acres on the Nechelle river in the same section. An influx of Swiss farmers is expected into the province, with a view to settlement, being graduates of the agricultural college at Zurich. They are mainly interested in the dairy business.

CROSSFIELD, ALBERTA, MAY 20, 1919

Local and General.

Our local Baseball team journeyed
to Carstairs on Friday evening May
14th, for the purpose of a little prac-
tice game and to break in their new
uniforms. After a very exciting
6 innings the game was called on
account of darkness the score being
8-9 in favor of Crossfield. As usual
a dance took place in the Hall im-
mediately after the Crossfield Dramatic
Society had produced their
Comedy-Farce entitled "Safety
First" which we know was thor-
oughly enjoyed and appreciated by
all who availed themselves of the
opportunity of seeing and hearing
this well staged play.

BASEBALL

At a meeting held in the O. L. U.
Club Room, Crossfield, on Thursday
evening, May 13th, for the purpose
of organizing a Baseball League the
following four towns were represent-
ed, Airdrie, Crossfield, Carstairs and
Didsbury, these towns being repre-
sented by Messrs McAdams, Jenks
and Edwards of Airdrie, Messrs
R. W. McFarlane, A. W. Gordon
and C. S. Casey of Crossfield, Messrs
Young and Hall of Carstairs, Messrs
Herron, Freeman and Rieber of
Didsbury. The League was duly
formed being named the Rosebud
Baseball League and will be run on
somewhat similar lines to the Rose-
bud Hockey League during the past
Winter, six games will be played at
home and six away. Mr. R. W.
McFarlane, of Crossfield was elected
President of the League, Mr.
Young, of Carstairs Vice President,
with Mr. C. S. Casey, of Crossfield,
as Sec. Treas. A schedule was drawn
up the games of which will com-
mence on June 1st. The first game
of the season at Crossfield will be
Airdrie vs Crossfield on Tuesday
evening, June 1st, on the diamond
in the Fair Ground, to commence
at 6.30 p. m. so that all will have
an opportunity of attending. Your
hearty support and co-operation is
generously solicited.

BIRTH

HORSES ADVISE

Zam-Buk, because they have proved that it does what is claimed for it. Miss B. Z. Dorey, graduate nurse, of 3220 Michiana Ave., Chicago, says: "I have a patient who suffered terribly with piles. Zam-Buk is the only remedy that gave her relief."

"I have used Zam-Buk myself for the same ailment, also for sores and burns, and have the greatest confidence in it."

Zam-Buk

THE COW PUNCHER

— BY — ROBERT J. G. STEAD

Copyrighted, Canada, 1918, By The Mussion Book Co. Ltd., Toronto. Printed By Special Arrangement.

(Continued.)

"Well," he said. His voice was mechanical, but in it was something which quickened her hope; something that suggested that he was making it mechanical because he dared not let it express the human emotion which was struggling for utterance.

"Let me talk to you, Dave," she pleaded. "I have followed you around the world for this. Let me talk. I can explain everything."

He stood still as if he would speak. She dared not reach her hands to him, she could only stand and wait.

"Irene," he said, "Why did you follow me here?"

"There is only one answer, Dave. Because I love you and would follow you anywhere. No one can stop me doing that; no one, Dave — except you."

And again he stood, and she knew that he was turning over in his mind things weightier than life or death, and that when he spoke again his course would be set. Then, in the partial shadow of the porch, she saw him slowly extend; they rose, wide and strong, and extended toward her, and the world swooned and waited.

"I can explain everything," she said when she could talk.

"You need explain nothing," he returned. "I have lived the torments of the damned. Edith Duncan was right. She said that if I were not loved, it would never give up. 'Endureth all things,' she said. . . . There is no limit."

She caressed his cheeks with her fingers and knew by the touch that they were brown again as they had been in those great days of the foot hills. "But I must tell you, dear," she said, "so that you may understand." And then she patched together the story from what she knew and from what Edith Duncan had told her, and Dave lived in what neither had known, including the incident earlier on that fateful evening. She could see his jaws harden, as they paced the plot together, and she knew what he was thinking.

"Your country needs you more," she whispered. "It better that you. And what a man you are in uniform! I think I see you smashing heads instead of bottles. Sit out of six Dave. I'm awful, but you must do it. Already we know what has happened in Belgium. You will forget your own wrongs in the greater wrongs of others. . . . And I shall join the service as a nurse. My father was a doctor, and I can soon pick it up."

She chatted on, but he had become suddenly grave. "I don't think that is your course, Irene," he said. "This is going to be a bigger job than it looked. The Government will get soldiers and nurses; the popular imagination turns to such things. But it will be getting a few more nurses that will win the war. I feel sure of that now. It has come to me, perhaps as a kind of presentment, but I feel absolutely sure. The determining factor will be food. The world's margin is narrow enough in normal times, and now we are plunged into the abnormal. Millions of men will be taken from production and turned

to purposes of production. They will be taken from offices, where they need little food, and put in the trenches, where they need much food. Countries will be devastated; armies will retreat, destroying all food as they go. Ships will go down with cargoes of wheat; incendiary bombs will swallow warehouses of food. I do not regret my decision, I believe my place is in the trenches; but those less fit for the fight than I must, in some form or other, produce food. That include the women, I believe you."

"Me? But what can I do?"

"Since I left home I've thought a good deal of life and ranching. I despised it in those prosperous days — those days we thought were prosperous — but the prosperity is gone and the ranch remains. It still lies out there, just as it did when you and your father motored down that afternoon a dozen years ago. I think you will have to go back there, Recnie, I think you will have to take the boy and Charlie and what other help you can get, and go back to the old ranch and start something for the soldiers to eat. You can do it. There are good men to be had; men who can't very well afford to be idle, but who will plow. And believe me, Recnie, it's the plow that's going to win. Go back and put the plow in the ground every furrow as another trench in the defenses which shall save your home and the fate of Belgium's homes. It's not as easy as going to the front; it hasn't got the heroic ring to it, and I suppose there are men who will commercialize it. Let them. We shall need their profits after the war to put out debt. But I believe the thing that must be done. And you'll do it, won't you?"

"I'll do whatever needs to be done, Dave. I'd rather be by your side, or as near as may be, but if you say that my duty lies back on the old ranch, I shall go back the old ranch and raise food for my soldier. And when it's over we shall ride those old hillsides again. . . . Up the Canyon, you remember, Dave? The little niche in the wall of the canyon, and all the silence and the sunlight. . . . Forever. . . ."

CHAPTER XXII.

Any philosophy which accepts the principle that the great, over-shadowing influence of the world is an intelligent controlling influence must of necessity grant that the same principle applies to the most common place and everyday experiences. It is impossible to believe that the world war, for example, has a definite place in the eternal scheme of the universe, without believing the same of the apparently trivial incident in the life of Kaiser Wilhelm, Lloyd George of Woodrow Wilson, or for that matter, of the humblest soldier in the ranks. The course of the greatest stream of events may well be deflected by incidents so commonplace as to quite escape the notice of the casual observer.

Some such thought as this comforted me—or, at least, would have comforted me had I thought of it—when a leaking gasoline tank left me, literally as well as figuratively, wet and dry in the foothills. The sun of an August afternoon blazed his glory from a cloudless sky; far across the shimmering hills, copper-colored patches of ripening wheat stood out, and glowing like the twelve-century armor on the brown breast of the prairie; low in a valley to the westward the glimmering mountain water threaded its way through fringes of spruce and cottonwood, while on the uplands beyond the steep drowsed in the sunshine, and far to the westward the Rockies slept in the arms of their drapery of alpine noon purple. All these scenes the eye took in without enthusiasm, almost without approval; the sun on the whitewashed ranch buildings almost the shadow underneath. And in these a ranch—almost any ranch—means gasoline.

I soon was at the door. The walls had been recently white-washed; there were new shingles of red cedar on the roof; flowers bloomed in the path that led down to the corral. My knock attracted a little chap of two-and-a-half or three years; his stout hands shoved the screen back, and I found myself ushered into his company. There evidently was no one else about, so I visited, and we talked on those things which are of importance in the world of three-year-olds. "Mother's don't to the water," he confided. "She turn back pretty soon."

"And father?" I asked. "Where is he?"

Into the dark eyes came a deeper look; they suddenly shone, with the spirituality of a life only three years removed from the infant. By way of instruction, I afterwards wondered, by what almost divine charm had the been able to instill into his young mind the honor and the glory and pride of it? For there was pride, and something more than pride; adoration, perhaps, in his words, as he straightened up and said in perfect English, "My father was a soldier. He was killed at Courtrai."

I looked into his little, sunburned face; in his dark round eyes; and presently a strange mist enveloped the room. How many little faces, how many pairs of eyes! It was just fading away when a step sounded on the walk, and I arose as she reached the door.

"The Man of the House has made me at home," I managed to say. "I am sprinkled on the hill, for a little gasoline."

"There is plenty out in the field, where the tractor is," she replied.

"You will find it without difficulty. Or you can ask me where, Charlie, may be along presently."

Her voice had sweet, modulated tones, with just that touch of pathos which only the Angel of Suffering knows how to add. And her face was fair and gentle, and a little sad, and very sweet.

He has told me a little. There seems no reason why I should not say it. She had entered into the sisterhood—that universal sisterhood of suffering which all worlds have in common, in these long, lonely years. . . . And it was between us, for we were all in the family. There was no occasion to scrape acquaintance by slow, conventional thrust and parry.

"Yes," she said, sitting down and motioning me to a chair. "I was bitter at first. But gradually I got a different view of it. Gradually I came to feel and know that all we can feel and know there is on the surface; on the outside, you might say, and we can't know the purpose until we are inside. It is as though life were a riddle, and the key is hidden, and the door behind which the key is hidden is called Death. And I don't believe in that! I believe in life. I believe that I am all for nothing I would quit; we would all quit."

(To be continued)

She Thought Dress Would Look Dye

But "Diamond Dyes" Turned Her Faded, Old Shabby Apparel Into New

Don't worry about perfect results. Use "Diamond Dyes" guaranteed to give a new, rich, luscious color to any fabric, whether it be wool, silk, linen, cotton or mixed goods—dresses, blouses, stockings, skirts, children's coats, fashers' draperies, coverings—everything!

The Direction Book with each package tells how to diamond dye over any color.

To match any material, have dealer show you "Diamond Dye" Color Card.

High Price For Farm Land

One hundred dollars per acre was paid for 640 acres of land west of Nelford, Alberta, in a high state of cultivation but not otherwise improved. This is one of the highest prices paid for a block of non-irrigated land in this sector.

Lift off Corns!

Doesn't hurt a bit and Freezes costs only a few cents.

With your fingers! You can lift off any hard corn, soft corn, or corn between the toes, and get rid of all corn calluses from bottom of feet. A tiny bottle of "Freezone" costs little more than a nickel, and it drops upon the corn or callus. Instantly it stops burning, then shortly you lift the corn—almost any corn or callus right off, root and all, without one bit of pain or soreness. Truly! No humbug!

Preserve Farm Property

No matter how substantial a building is, the elements will damage it if given a chance. Unless the surface is protected by a surface coating, wear and the elements will work away at it constantly. Barns weaken and partially collapse, silos decay, pens and coops go to pieces and are split up for firewood—all of which happens long before the building's time.

There are millions invested in farm buildings in this country. There are also many millions of dollars worth of farm machinery. Both property and implements can be indefinitely conserved by paint and varnish at a cost amounting to only a fraction of the loss which otherwise occurs.

Frankness makes people disagreeable, but not all-disagreeable people are frank.

 Zeirins, Zeirins, Zeirins, Zeirins—Keep Your Eyes Strong and Healthy. If they Tired, Smart, Itch, or Burn, It Sore, Irritated, Inflamed, or Itchy, Use Zeirins. Use Zeirins often. Safe for Infant or Adult. At All Drugists in Canada. Write for Free Eye Book. Market Company, Chicago, U.S.A.

W. H. U. 1215

U.S. Sentiment Changes

Low Priced Land in Western Canada Is Attracting American Settlers

Sentiment in the United States, which for a long period was apathetic and even adverse, so far as Manitoba and other western Canadian farm lands were concerned, has undergone a complete change in favor of the purchasing of tracts on this side of the border. This is the report that was brought back from Chicago, Ill., by L. Arsenault, president of the Arsenault agencies, limited, who has just returned from a southern business trip.

Much of the credit for this change in public opinion is due to De Witt Foster, superintendent of resources for the Canadian National Railway; Mr. Arsenault said. Mr. Foster has done great campaign work in various states and has succeeded in convincing landseekers that land can be purchased in western Canada for \$25 per acre equal to that for which they are obliged to pay \$400 per acre in their own states.

This advertising of Western Canadian lands has interested men in Illinois, Indiana, Iowa, Texas, Minnesota and North and South Dakota, and present indications point to a record year in immigration from the south. These men all have plenty of money, and much American capital will be invested in western Canadian lands. —Winnipeg Free Press.

Minard's Liniment Co. Limited.

Dear Sir,—Your MINARD'S LINIMENT is our remedy for sore throats and all ordinary ailments.

It never fails to relieve promptly.

Yours faithfully,
 CHAS. WHOOTEN

Port Mulgrave.

Canada Pulp Supplies

British Interests Securing Pulp Wood Limits Here

G. R. Hall Caine, son of Hall Caine the novelist, was recently in Ottawa. In the course of an interview Mr. Caine said that he was negotiating for the purchase of pulp wood limits and pulp, the company he represents being prepared to spend \$400,000 on the enterprise. Mr. Caine, who is himself a director of several English paper mill companies, and a pulp and paper company in Canada, is representing seven of the largest newspaper publishers in England whose object in securing pulp wood limits is to insure for their paper a continuous supply of newsprint. Negotiations are under way for the purchase of 1,000 square miles of limits. Incidentally Mr. Caine expressed the opinion that there would be a great influx of English capital to Canada in the next few years. The eyes of English business men were turning toward Canada at the present moment as never before.

More men would marry only for love if they could afford it.

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin At All without the "Bayer Cross"

The name "Bayer" identifies the only genuine Aspirin, the Bayer Aspirin, prescribed by physicians for over nineteen years and now made in Canada. Always buy an unbroken package of "Bayer Tablets of Aspirin" a few cents. Larger "Bayer" packages.

There is only one Aspirin—Bayer's—You must say "Bayer's" Aspirin to the trade man (retailer) in Canada. If you say "Aspirin" you are misled. While it is well known that Aspirin means Bayer, it is not known that Bayer means Bayer's Aspirin. The name "Bayer" is the only name that will be accepted with their general trade mark, the "Bayer Cross."

 During the month of March, 99 new companies were incorporated in B.C. Four were fishery companies; 2 agricultural; 9 mining and 22 lumbering. The remainder were composed of oil exploration, brokers, importers and retail businesses.

Miss Flora Boyko Tells How Cuticura Healed Her Pimples
 "My face was very itchy at first, and after that it was covered with pimples that disfigured it badly. The pimples were hard and red and they were small and they were scattered all over my face, and were itchy to the point of making me scratch and I could not sleep."
 "These bothered me nearly a year before I used Cuticura Soap and Ointment and when I had used five boxes of Cuticura Soap and five boxes of Cuticura Ointment I was healed."
 (Signed) Miss Flora M. Boyko, Gardenton, Mass., Dec. 26, 1918.
 Having obtained a clear healthy skin by the use of Cuticura, keep it clear by using the Soap for all toilet purposes, assisted by touches of Cuticura as needed. Do not fail to include the exquisitely scented Cuticura talcum in your toilet preparations.
 For free sample card of Cuticura Soap, Ointment and Cuticura talcum, write to: "Cuticura, Dept. A, Boston, U.S.A." Send no money.

A Dyspepsia Cure

M.D. advises: "Persons who suffer from severe indigestion and constipation can find themselves relieved by taking fifteen to thirty drops of Extract of Nettle after each meal and at bedtime. This remedy is known as Nettle Extract Syrup in the drug trade." Get the genuine. 50c. and \$1.00 Bottles.

Board Estimates The Value of Wheat Certificates

Winnipeg.—James Stewart, chairman of the Canadian wheat board, announces that the value of the "participation certificates" will not be less than 40 cents per bushel.

The official statement of the board reads as follows:
The Canadian wheat board feels that some idea should be given as to the probable value of the participation certificates issued by the board. The wheat has not all been marketed by the farmers, and it is indeed difficult to estimate closely the quantity remaining in their hands to be marketed before the new crop. Other factors enter into the situation, such as the values prevailing when and as the wheat is marketed, as well as the quantity required for domestic use before the new crop, a late harvest making a difference of several million bushels.

Notwithstanding this, the board estimates that it should be able to pay at least 40 cents per bushel against the wheat represented by the participation certificates.

At the conclusion of the present season complete returns of the year's operations will be made known, and a final report as to the full value of the participation certificates will be issued.

Registration in Manitoba

To Register For Next Fall Vote On Dry Province

Winnipeg.—Registration for the coming provincial general election, it is officially announced, will begin in Winnipeg at 143 polling divisions on May 10 and extend over the next two days. But it is not registration for this election alone. Some time in the late summer or early fall the people of Manitoba will be given an opportunity of saying whether they want a bone dry province or not. Those who register will have the opportunity of expressing their views by the ballot. Those who do not will not have this right.

Price for 1920 Crop

Ottawa.—It is freely predicted in authoritative quarters that the price of the 1920 crop will be higher, some members believing that it will go to \$3.00 per bushel, provided there are no internal troubles in any of the larger countries of the world.

Continuance of the wheat board is still looked for, in view of the fact that European governments have practically decided to stand together.

Hun Delegation Reaches London.
—A German delegation, headed by Dr. Zeelinger, has arrived in London to settle with the maritime section of the reparations committee the questions of the remaining ships to be handed over to the allies.

LET "DANDERINE" BEAUTIFY HAIR

Girls! Have a mass of long, thick, gleamy hair

Let "Danderine" save your hair and double its beauty. You can have lots of long, thick, strong, lustrous hair. Don't let it stay lifeless, thin, scraggly or fading. Bring back its color, vigor and vitality.

Get a 3-cent bottle of delightful "Danderine" at any drug or toilet counter to freshen your scalp; check dandruff and falling hair. Your hair needs this stimulating tonic, then its life, color, brightness and abundance will return—Hurry!

All Want Representation

Other Dominions May Ask For Privilege of Individual Ambassador
Montreal.—A London cable to the Montreal star says: "If Canada is permitted to establish an individual diplomatic representative in Washington, three other great British colonies may be expected to ask for the same privilege. This is the personal opinion of several members of the foreign office staff. The dominions referred to are New Zealand, South Africa and Australia. These officials take the view that the dominions should be accorded the fullest freedom in conducting their international tariff, customs, boundaries and immigration affairs. The only matters which should be strictly reserved for the British ambassador are those pertaining to the foreign policy of the empire as a whole, they believe.

Wilson Is Criticized

No Excuse at All For Prolongation, Of War, Says Senator Knox

Washington.—Opening the debate on his resolution to declare the state of war with Germany and Austria at its end, Senator Knox, of Pennsylvania, declared in the senate that President Wilson was arbitrarily maintaining that the U.S. technically was at war in order to coerce the senate into ratification of the Treaty of Versailles.

"There was no excuse whatsoever for greatly prolonging the war beyond the signature of the armistice," Senator Knox said, "and the only explanation for so doing was the deliberate aim to retain all those autocratic compulsory powers, with which the executive had been endowed for the prosecution of the war, in order that they might be used for other purposes."

Declaring that he entertained only sympathy for the president in his illness and "sympathy for the country which must suffer under him because of it," Senator Knox said it was an unwelcome task to judge one who has fallen in public esteem. "The Senate then launched into a severe criticism of the president for his 'stand pat attitude' in regard to the treaty.

Strangled Girl At Own Request

Alleged Confession is Placed As Evidence in Trial on Charge

Of Murder
Pontiac, Mich.—The state has closed its case in the trial of Anzon Best, charged with the murder of Miss Vera Schneider, and a few character witnesses were examined for the defense. Best, it was said, would probably take the stand in his own behalf.

After the introduction of an alleged confession over the objection of defense counsel, newspaper men who interviewed Best related the prisoners' alleged statements that he had strangled the telephone operator at her own request.

County officers placed on the stand declared they had not used force in obtaining the alleged confession, as claimed by Best when he repudiated the statement attributed to him by Prosecutor Gillespie.

Further Advance in Paper Prices

Washington.—Further advances in print paper prices are to be made by the International Paper company on July 1, said a telegram from Chester W. Lyman, vice-president of the company, which was presented to the senate committee now investigating the paper shortage. "The message was addressed to Joseph Pulitzer, Jr., publisher of the St. Louis Post-Dispatch.

Hindenburg's Statue is Confiscated

Berlin.—The colossal Hindenburg war statue, standing in front of the Reichstag, has been confiscated by the police. This action was taken in order to prevent the possibility of disorders in the event of its being moved from Germany.

Permanent Board To Buy Supplies

Business Interests Throughout Country Send Resolutions to Government

Ottawa.—Communications from the business interests throughout the country have been received by the government favoring the bill to establish a permanent board for the purchase of governmental and other supplies. Resolutions in approval have been received from the boards of trade of Vancouver, Calgary, Moose Jaw, Medicine Hat, Saskatoon and Winnipeg, the associated boards of trade of British Columbia and the Canadian Manufacturers' Association. The point generally taken in the question is that the establishment of such a board would mean greater economy in the purchase of supplies and give every man engaged in the business a fair chance to compete.

Ontario Liquor Laws

Board of License Commissioners Is Given Greater Measure of Control

Toronto.—Amendments to the Ontario Temperance act introduced by Hon. N. C. Nixon in the legislature reduces the minimum penalty to be imposed on persons having liquor illegally in their possession from \$200 to \$100. The maximum penalty that may be imposed under the act is increased, however, from \$1,000 to \$2,000. Either a fine or imprisonment may be imposed at the magistrates' discretion.

The board of license commissioners is given a greater measure of control over the number of prescriptions issued by physicians by being empowered to refuse to honor prescriptions issued too promiscuously. The allowance of liquor to dentists for medicinal purposes is increased from six ounces to one quart.

A person convicted of a breach of the Ontario Temperance Act will be forbidden to have liquor in his home even if he move from the house in which the liquor was kept. This prohibition remains in force for a year following the conviction.

Persons convicted of being drunk or disorderly twice within three months may be committed to jail or to an industrial farm for a period of not more than three months.

Certain ships on lakes or rivers within the province are made responsible for infractions of the act which may occur on their vessels.

Imprisonment without the option of a fine, is made the penalty for persons who are intoxicated while in charge of a motor car under a bill introduced by Hon. W. E. Raney. Dr. Stevenson of London, suggested confiscation of automobiles while the owners were in prison.

"SYRUP OF FIGS"

CHILD'S LAXATIVE

Look at tongue! Remove poisons from little stomach, liver and bowels

Accept "California Syrup of Figs" only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for little stomach, liver and bowels. Children love its delicious fruit taste. Full directions for child's dose on each bottle. Give it without fear. Mother! You must say "California."

North Schleswig Becomes Part of Danish Territory

Forced to Economize

Former Kaiser's Whole Stable is up For Auction

The Hague.—Horses, carriages and harness belonging to the former German emperor, including a set of gold mounted harness presented to him by the Pope, are offered for sale in a display advertisement in the Handelsblad. The advertisement is signed only with a number, but it is agreed to furnish photographs and other information. So far as the Associated Press is able to learn, no doubt exists that it is Count Hohenlohn himself who is disposing of the goods. For some time past rumor at Amerongen has had it that the former emperor's financial condition has not been thriving.

Best Medicine He Has Ever Taken

FATHER TELLS OF SON'S HELP FROM DODD'S MEDICINES

He Recommends Everybody Who Has Shaking or Pain in the Heart To Use Dodd's Dyspepsia Tablets and Dodd's Kidney Pills.
Birmingham, Sask., May 10th.—(Special).—"Dodd's Kidney Pills and Dodd's Dyspepsia Tablets are the best medicines my son has ever taken."

This is the statement of Mr. Johannes Reinson, a well-known resident here. "When he started to take them," Mr. Reinson continues, "there was not much hope of him. Soon after he began to take the Dodd's Medicines he began to improve in health and now he is well."

He advises everybody who has shaking or pain in the heart to use Dodd's Kidney Pills and Dodd's Dyspepsia Tablets.

The Dodd's Medicines act on the two essentials to good health. The Tablets help to digest food and produce good blood. The Pills act on the kidneys, healing and strengthening them, thus ensuring that the blood is kept free from impurities. For the work of healthy kidneys is to strain all impurities out of the blood.

Ask your neighbors if Dodd's Kidney Pills do not heal and strengthen the kidneys.

British Trade Improving

Unemployment is Less Now Than in Any Period Before

The War
London.—Sir Robert Horne, president of the board of trade, speaking at a dinner of the London chamber of commerce, said that the present state of British trade showed that the nation could go forward with the greatest confidence. Unemployment, he said, was today lower than at any period before the war, although about eight hundred thousand more people were now engaged in industry. About 85 percent of the returned soldiers had now been absorbed in industry.

Among the guests were Sir George Perley, Canadian high commissioner and Sir Lomer Gouin, premier of Quebec.

To Repatriate Huns

Two Hundred Thousand Prisoners in Russia Said to be in Terrible Condition

Washington.—Dr. Fridtolf Nansen, the Norwegian explorer, probably will head the organization to be set up by the League of Nations for the purpose of repatriating 200,000 German, Austrian and other war prisoners still held in Russia. Reports to be submitted to the league council at Rome this month say that unless these men are rescued from their prison camps in Siberia before next winter few of them are likely to survive. They have been in captivity for five years.

Votes for Women

Cape Town, Union of South Africa.—The house of assembly has passed a resolution favoring the extension of the parliamentary franchise to women.

W. N. U. 1315

Copenhagen.—Danish troops have occupied Northern Schleswig, the people of which on February 10 last, in a plebiscite provided for in the peace treaty, voted by a large majority for a return of this part of the territory to Danish nationality.

The Germans had been in control there since 1866. Enthusiastic scenes accompanied the arrival of the Danes at Sonderburg. There the entire population, among them a number of aged persons, who still remembered the rain of German shells on the town 36 years ago, and about 50 veterans of the war of 1864 were out to cheer them.

A force of Danes also arrived in Haderslev (Hadersleben) and were welcomed by a crowd estimated to aggregate 20,000. Danish and French troops marched through beflagged streets to the barracks, where, amid great rejoicing, the German colors were hauled down and the Danish flag was hoisted. At Tondern, British troops were drawn up to receive the Danes.

Admiral Sheppard, commander of the allied occupation forces, will officially transfer the military authority to the Danish commander at Sonderburg.

In the war of 1864, Prussia and Austria wrested the duchies of Schleswig and Holstein from Denmark. Two years later Prussia's victory over Austria resulted in the incorporation of the duchies in the dominions of Prussia with the provision that the people ultimately should decide their nationality by plebiscite. This agreement never was kept by Prussia and was repudiated by her on the formation of the German Empire in 1871.

Canadians at Labor Conference

Meeting to be Held in Genoa on June 15 Under Auspices of the League of Nations

Ottawa.—Canada will be represented at the second International Labor conference called under the auspices of the League of Nations. The conference is due to open in Genoa, Italy, on June 15. The Canadian delegates will be: Government, Sir George Perley, high commissioner in London; C. J. Desbarates, deputy minister of naval service; Employers' Thos. Robb, Montreal; Shipping, Federation of Canada Workers, G. J. Gauthier, Montreal, seamen's union.

The conference has been specially called to deal with labor questions affecting seamen.

Volcano Eruption

New York.—Indications that a volcano eruption is taking place on the Island of Providence, belonging to Columbia, and 120 miles off the coast of the Caribbean sea, were reported today by the United Fruit Company steamer Calamates.

Keep Your Automobile Like New

KLEANALL AUTO Body Top Dressing

Gives your automobile a lasting brilliant polish that does not catch dust. Removes all dirt and grease. Easily applied. Preserves the finish.

RE-NU-ALL Auto Top Dressing

Made especially for leather, pantaloons, mohair and rubber tops. Preserves the top and makes it waterproof. Leaves a rich, lasting enamel finish. Will not peel or crack.

Canadian Polishes, Limited,
Hamilton, Ont.

Only One Way In Which to Remedy the Teacher Shortage

According to ex-Secretary Lane, of the Interior Department, last year in this country 145,000 public school teachers resigned their places. In Mr. Lane's words, the public school, the "greatest bulwark against the spread of Bolshevism," is crumbling. The cause lies in the fact that teachers' salaries have not kept pace with the increased cost of living.

We cannot blame teachers for leaving their places. Their ability to procure the necessities of life at prevailing prices depends on getting a job paying considerably more than they can hope to get by sticking to school-teaching.

And this is not the worst. To the nature of things, as Mr. Lane said, it is the ablest and most versatile of the teachers who have gone out from the schools.

So far 1920 has only accentuated the history of 1919. In Philadelphia, for instance, the situation is so bad that in its public schools nearly 100 substitute teachers are needed; more than 5,000 children have been forced either to leave school or to receive only part-time instruction. In St.

Louis about 100 teachers have resigned to enter commercial life and in Memphis certainly an equal number. In New Orleans the teachers received a 30 per cent salary increase in February, and their resignations have fallen off. The same is true of San Francisco.

In the autumn of 1919 and the winter of 1920 in New York city, over a thousand teachers resigned. By the end of February some 3,000 classes were teacherless and 118,000 children were sent home. In the attempt to remedy the teacher shortage in both state and city, the Public Education Association appointed an industrial committee of 100 eminent citizens to urge the passage of appropriate legislation. Two salary increase bills are before the legislature at Albany. One of them would increase the higher grade teachers about 20 per cent, and the lower grade about 40 per cent. The other would provide not so much, but flat increases for all teachers. The minimum salary in the first bill would be \$1,300, and in the second, \$1,600. The Public Education Association is supporting the second bill.—New York Outlook.

Gardening For Schools

School Garden A Big Classroom For Outdoor Instruction

Gardening is systematically carried on by the public schools of many Canadian cities as part of the educational course. Dr. J. H. Putman, senior inspector for Ottawa public schools, in the March number of the Agricultural Gazette published by the department of agriculture at Ottawa, describes the system under which this work is done in the Capital City.

The school garden is referred to as a big class room for outdoor instruction in plants and plant life. It has many of the possibilities in miniature of an experimental farm. It has to do with the composition and fertility of soils, with drainage, with seed germination and with insect enemies of plant life. It shows in a way that cannot be questioned the effect upon plants of too much or too little sunshine or moisture and the bad effects of weeds and the necessity of giving them plenty of room if we wish to secure a high state of development. Dr. Putman points out that these things would mean nothing to city children if recited from books or told by teachers. These things taught through a garden where the children prepare the soil, sow the seeds, and care for the plants cannot be without good results.

In addition to a central garden of one acre the Ottawa plan involves the organization of home garden clubs, each representing a school. In the three years, 1917-18 and 1919, about 1,000 pupils from second and third grade classes received gardening instruction. The school board paid \$40 to each teacher who managed a club garden. Every pupil member was required to keep an accurate record of planting, cultivating and other activities. The aim was to put everything possible from seed. Gold frames were found to be a valuable addition to the equipment. In the central garden, instead of giving pupils very small individual plots, a plot 22 by 43 feet for vegetables and 16 by 20 feet for flowers is given to each class. This garden is having a permanent perennial border established which will give succession of bloom as well as an opportunity to show the children what they may have in their own home gardens.

The Farm and the City

Farm System Must be Brought to A State of Efficiency

During the past month there has been an abnormal number of auction sales in the country. In most cases the reason given for disposing of the land is the low price of high price of labor. The procession from the farm to the city continues, and it looks as though prices of produce will go still higher or the quantity will decrease, for apparently the returns from farming are not as attractive as those offered by the shops in the cities. The farmer is absolutely necessary to the city and either city wages must come down or farm prices go up. The farm laborers are justified in refusing to work from dawn till dark for wages below that paid in the cities, and the farmer finds himself hard put to get help. The farm business must be made to pay enough so that for the same number of hours wages on a par with the city can be paid. Farm system efficiency must be on a par with the factories or unequal conditions will cause serious complications which will affect the whole of Canada. The day has passed when a farmer could keep his sons on the farm and work them as hired men without pay.—From the Huntington, Que., Gleaner.

Grazing Grounds for Reindeer

As a result of the recommendations made to the government by the commission headed by Dr. J. G. Rutherford, an order has been passed setting aside three islands in the Northwest territories as grazing grounds for muskox and reindeer. The three islands named, Southampton, Mansel and Goat's, are all favorably situated with plenty of food and suitable climatic conditions.

Instead of sending a friend on a fool's errand go yourself.

W. N. U. 1921

War-Stricken Europe Slowly Recovering from The Shock of War

"The gaping wounds of Europe are gradually healing and the San Remo conference marks a distinct stage in its convalescence," said Premier Lloyd George in closing his speech in the house of commons, detailing the results of what he described as "the most remarkable conference in every respect held since the armistice."

The premier's statement was most optimistic, setting forth the claim that the conference had removed all misunderstanding between France and England, and that the allies were in complete agreement not only to enforce the treaty, especially the disarmament clauses, but against any French annexation of German territory.

"For," added the premier, "we cannot have another Alsace-Lorraine." Mr. Lloyd George further indicated that if Germany brought definite proposals to the Spa conference concerning the amount of indemnity she was able and willing to pay, she would be treated with consideration. The premier dealt minutely with Germany, he referred to the German government's difficulties in getting its decrees obeyed and emphasized that the Germans

were "a broken-backed people" whose actions were cowardly.

"We have information from British officers," he continued, "that there is famine in the land and that many people get only a third of their needful food." He expressed the conviction that the people of neither Germany nor France wanted militarism. Dealing with the Turkish treaty he added little to what is already known from M. Millerand's speech, and declared that neither Great Britain, France or Italy was able to undertake the mandate for Armenia because that would have involved heavy military resources for a great conquest, if the Armenians were to have anything more than a "paper Armenia."

The premier confirmed that the British mandate would include Mesopotamia and that the conference had reaffirmed its decision to open trade relations with Russia.

It was, however, impossible to undertake the responsibility of Armenia the whole position, the premier said; would require reconsideration, and England would have to take a hand in helping the Armenians to equip themselves for their difficult and perilous task.

Great North of Northern Manitoba

Action To be Taken in the Development of Large Pulp Resources

Prof. R. C. Wallace, commissioner of Northern Manitoba, says that comprehensive development in mining, lumbering and pulpwood manufacture are under way in Northern Manitoba, and the big changes are expected to be made during the summer.

The Pas Lumber Company, a \$1,000,000 concern, has started several logging camps in the Carrot River district, and the mill at the Pas is being enlarged to meet requirements. The logs, while cut in Saskatchewan territory, are floated down to the Pas for manufacture into lumber.

Action is also expected to be taken in the development of the large pulp resources. An Ottawa syndicate has held discussions here for some time. Camps will probably be established, and water power projects located during the present year. As to mining operations, the commissioner spoke of the development work planned by the Vito Fluv syndicate. Large numbers of prospectors are preparing to go into the mineral area as soon as conditions permit travel.

A Profitable Exchange

Iowa Farmer Secures Land in Saskatchewan Without Any Expense

Owing to the exchange rate between Canada and the United States, an American farmer recently purchased a farm near Prince Albert, which cost him absolutely nothing; he had sold his farm in Iowa for \$300 an acre, and on his arrival here, found that the existing rate of exchange gave him \$245 for every \$100 he had brought over. In this district he found a farm that pleased him at \$45 an acre, and after completing his purchase, had exactly the same amount of money in hand for which he sold his farm in Iowa, and possessing a fine Canadian farm. He has written to his friends in the States, and claims that his experience is liable to induce a great many more mid-western American farmers to take up land in Western Canada.

Iceland Applies for Membership

The independent state of Iceland has applied for membership in the League of Nations. Other applications to be heard at the Rome meeting of the council of the league are from the republic of Georgia, San Marino, and Luxembourg.

What's in A Name
He—May I call you by your first name?

Leave Erin Alone To Solve Problems

New British Ambassador to U.S. Says Englishmen Have Refused To Quibble

New York.—Declaring that in this generation there is no quarrel between England and Ireland, Sir Auckland Geddes, new British ambassador to the United States, asserted on his arrival in New York that the Irish in Ireland should be allowed to grapple without outside interference.

Asserting that it takes two to make a quarrel, and that the present generation of Englishmen had steadfastly refused to quarrel with Ireland, he said that when the new home rule bill becomes operative, it will be the duty of all British subjects who are not domiciled in Ireland to stand aside and leave the Irish to live their lives to solve their problems.

"I venture to add," Sir Auckland continued, "that it will also be the duty of all Irish subjects who are not domiciled in Ireland, to grapple with their own political difficulties."

Sir Auckland also referred to the present situation, stating that until Russia returns to the circle of producing and trading nations, economic conditions of the world and the cost of living cannot be placed on a normal footing anywhere. He added that the United States and Great Britain were in cordial consultation on the question of reopening trade with that country.

The Way To Do It

People Must Avoid Extravagance To Bring Prices Down

Speaking at a luncheon in London, England, given by the British Association of Trade and Industrial Journalists, Sir Auckland Geddes, formerly president of the British Board of Trade, and now ambassador to the United States, said in part: "Cheap plenty cannot be enjoyed again until the whole world is restocked with goods. . . The government's interest is to get prices down, and it can be relied upon to play its part; but all normal women in this country have a part to play also—to cut down the consumption of goods to the lowest possible level, to avoid all extravagance, and to work their hardest at their jobs, so that the output of our factories and the efficiency of our commercial, financial and general trading organizations may be brought to the highest level of efficiency of which we are capable."—St. Thomas Times-Journal.

One's first crop of wild oats may be a failure, but that is not a good and sufficient reason for sowing no more.

Power Resources Of British Columbia

One of the Greatest Industrial Assets This Province Contains

The water power wealth of British Columbia, it is said, equal to five Niagaras, is one of the greatest industrial assets this province contains. Pouring down from the mountains and from the glaciers that fill the gorges of the northern ranges, comes enough water every day to develop electrical power equivalent to three million of horse-power. This figure is not based on flood conditions, but is the estimate arrived at by government engineers working during low water seasons and using a conservative basis of estimate. The mighty falls of Niagara, when all the water that is available on the Canadian side has been harnessed to the turbines will produce only 650,000 horsepower. British Columbia's mighty rivers and mountain torrents, if they are harnessed, could supply its homes and industries with nearly five times as much power.

When it is remembered that only 123,000 electric horsepower can be developed by the plants which are at present supplying Vancouver, New Westminster and all the towns of British Columbia in the vicinity with power which drives the motors in the mills and factories, propels the street cars along the city streets and far out into the country, provides lights for the city's streets and homes, and the heat for the up-to-date kitchens, it will be easily understood that the total water power available in the province is sufficient to provide, power, light and heat for 40 cities and industrial centers of the size of Greater Vancouver and New Westminster all combined. British Columbia possesses in the liquid wealth that pours down from the hills the equivalent to five Niagaras, and all that this means for the future of the province industrially when these waters are harnessed and turned to the needs of men.

Exchange and Production

Accurate Barometer Of International Trade Situation

The fluctuating rate of exchange, inconvenient as it may be, is on the whole, an accurate barometer of the international trade situation.

A dollar bill is only a promise to pay and is valueless unless redeemable. Gold, however, is not the only commodity with which it can be honored. It can be redeemed with wheat, pulp, paper, lumber, fish, coal, anything at all of which the country is producing the note produces a surplus for export. The way to right-advise exchange is to speed up production, so that we can pay for all the goods imported with what we have exported. Retrenchment, that is, cutting down expenditures on unnecessary articles of luxury will help.

Auto and Highways

Motor Car is Now Classed As An "Economy"

One combination which is showing real team work in slashing at the high cost of living is the automobile and the improved condition of highways. Years ago an automobile was purely a luxury, later it became a necessity, and now it is a real economy. By means of it the city dweller is enabled to live outside of the high rent districts without sacrificing valuable business hours.

Furthermore, he can now live where he can raise his own garden and laugh at the soaring prices of food products. Recreation and clean, pure, health-giving air are provided for himself and the whole family.

The farmer who formerly had to plan his trips to town in order not to interrupt his scheduled work, can now run into town on a minute's notice to get needed supplies or for a bit of recreation. Instead of being hours from town he is now but a few minutes. It is just as good as moving closer.

In order that it be a real economy of course, the motor car must also be economically operated, and heretofore owners have been forced to decide between economy and luxury in choosing a motor car.

To Explore Hinterland

Exploration Party Starts on A Long Tour of Far North

Further exploration of Canada's far north will be undertaken this summer by a Dominion government expedition which left Winnipeg yesterday under the leadership of R. H. Kistler, one of the government's intelligence branch, department of the interior, Ottawa.

It was estimated that the party will travel roughly 4,000 miles from Winnipeg and return, following the various waterways northward to the divide between the Mackenzie and Yukon basins, via the Porcupine River to Yukon and Dawson City, then thence down to Vancouver. Mr. Kistler will make a side trip into the buffalo country at Fort Fitzgerald to report on conditions there. He will also report on the most northerly road in Canada, a vehicular road 16 miles in length, which the Dominion and Alberta governments are building jointly. It follows a trail which has been in use for hundreds of years, having been travelled in 1778 by the discoverer of the Mackenzie River. Another official purpose of his visit will be to look into mining properties at Stewart Lake. He expects to return to Winnipeg in September.—Free Press.

Ice-plant contains from 86 to 93 percent gelatine.

Worth a Guinea a Box.
Sold everywhere in Canada. In boxes 25c, 50c.

Trucks in Western Provinces

Value of the Truck in Hauling Grain To Market

In the western provinces of Canada the farmers are all future truck buyers. Many of these farmers are situated at from ten to sixty miles from railroads. The estimated cost for hauling grain is .03 per bushel per mile.

A good team of horses will haul 75 bushels at a speed of 2 1/2 miles per hour.

A two-ton truck will haul 80 bushels on a 20-mile trip in two hours and return in two hours, making two trips per day over good roads.

At a recent meeting of the Grain Growers in Saskatchewan, when this fact was pointed out to them, many got busy with pencil and paper and soon figured out where they could save the price of a truck in one season.

Minard's Liniment used by Physicians

New Alberta Bank

Application is being made for the incorporation of the "Bank of Alberta" with headquarters at Edmonton. A capital of \$2,000,000 is proposed, largely to be subscribed to by the farmers of the province, and branches will immediately be opened at Edmonton and at Calgary.

Applied After Shaving

Keeps the Skin Soft and Smooth

MANY men suffer from skin irritation after shaving. With some it assumes a form of eczema and becomes most annoying and unsightly. By applying a little of Dr. Chase's Ointment after shaving the irritation is overcome and such ailments as Barber's Itch and Eczema are cured.

60 cents a box, all dealers, or Edman, Sales & Co., Ltd., Toronto.

Dr. Chase's Ointment

Wonders of Wireless

But Mars Declines to Talk to This Planet

The message from Mars, for which Dr. Frederick H. Millener, noted scientist in wireless, searched interstellar space from his giant receiving plant near Omaha, Nebraska, did not materialize. If there were such a message passing through the ether for the fifty millions of miles which separates the earth and Mars it did not come sufficiently close to the earth to be picked up by the great receiving station which Dr. Millener has established on the banks of the Platte River.

For nine hours Dr. Millener and his assistant, L. H. Gamor, searched space for the signals which Mars is thought to be sending earthward. The first half of the night the wireless instruments were badly interfered with by static. Through the delicate receiving instruments came the crackling of lightning and other electric sounds to such an extent that no signals anywhere could be received.

The receiver was gradually tuned to its full length of wave. Starting at a short wave, its capacity was gradually increased. As its radius was extended the world's wireless business was picked up.

First a school station in Kansas was talking. Next Hawaii was picked up, sending to San Francisco. Then Berlin was heard calling the city of Mexico. Again a station on the coast of Venezuela sent a message to Madrid, then Valparaiso talked with London. Through and past all these zones, Dr. Millener tuned his receiver until all sounds had ceased. He was in the infinite. Back and forth his apparatus flashed, his range length receiver being the gamut from 16,000 to 300,000 and more. But not a sound came over the waves after the earth zone was past.

The scientists kept this up until daylight. Then Dr. Millener issued the following bulletin:

"The early part of the evening we were troubled with heavy static, so that it was impossible to hear anything except static in South America, Europe and the United States. During the latter hours of the night, when the wireless was stretched to its fullest extent to hear inter-planetary communication, we heard nothing that could be construed as a message from Mars."

Bulletin on Bee-Keeping

Published by the Manitoba Department of Agriculture

At present a great many people in Western Canada are enquiring as to where they can purchase bees, declaring their desire to take up the bee-keeping industry. To assist all such, and also all others who may be interested, the Manitoba Department of Agriculture has published a new 24-page illustrated bulletin entitled "Beekeeping in Manitoba." This bulletin is written by R. M. Muckle, B.S.A., special lecturer in beekeeping, who has had many years experience in beekeeping in Manitoba, and has had a wide opportunity, in connection with his departmental activities, of observing the beekeeping possibilities of all parts of the province. A free copy of the bulletin may be had on application to the Publications Branch, Manitoba Department of Agriculture, Winnipeg.

Survey of Physicians

In a survey prepared by the Faculty of Medicine of the University of Toronto in connection with the prospective gift of \$5,000,000 from the Rockefeller Foundation for Medical Research in Canada, it is shown that Toronto has one doctor to 567 of population; London, Ont., one doctor to 711; Hamilton, Ont., one doctor to 790; and Ottawa, Ont., one doctor to 840. Ontario leads in the roll call of provinces with one doctor to 766 of population. British Columbia comes next with one doctor to 905, Nova Scotia is third with one doctor to 1,028, and Manitoba, fourth, with one doctor to 1,146.

Keep Minard's Liniment in the House

In Thibet the people salute their superiors by taking off their hats and thrusting out their tongues three times.

DELICATE GIRLS MADE STRONG

Rich, Red Blood Needed to Keep Up Their Vitality

If growing girls are to become well developed, healthy women, their blood supply must be properly maintained. Mothers should not ignore their unsettled moods or the various troubles that tell of approaching womanhood. It should be constantly borne in mind that pale, bloodless girls need plenty of nourishment, plenty of sleep and regular open-air exercise. But a lack of appetite, and tired, aching limbs tend to hinder progress.

The weak, thin-blooded sufferer she must have new, rich, red blood and nothing meets this need so well as Dr. Williams' Pink Pills. These pills not only enrich and increase the blood supply, they help the appetite and aid digestion, relieve the weary back and limbs, thus promptly restoring health and strength and transforming anemic girls and women into cheerful, happy people. Among the thousands who have obtained health and strength through the use of Dr. Williams' Pink Pills in Miss Violet Booth, Glenora, Ont., who says: "For a long time I was in a badly run-down condition. I was pale, breathless at the least exertion, and could hardly do any housework without stopping to rest. I often had severe headaches, and my appetite was poor and fickle, and I would get up in the morning without feeling the least bit rested. I had tried every medicine, but did not get benefit from anything until I began the use of Dr. Williams' Pink Pills. When I had taken two boxes I could see an improvement, and after using six boxes I found my health fully restored. I feel altogether different. Since I used the pills that I strongly advise them for all weak, run-down people."

If you are weak or ailing in any way, avail yourself at once of the excellent home treatment which Dr. Williams' Pink Pills so easily afford, and you will be among those who rejoice in regained health. These pills are sold by all dealers in medicine, or may be had by mail at 50 cents a box or six boxes for \$2.50 by writing The Dr. Williams' Medicine Co., Brockville, Ontario, Canada.

Settlers in B. C.

Hundreds of settlers are expected to enter the Nechako Valley in the spring, and it is reported that many of them have pooled their funds of acres in the section have pooled their interests. They expect to have many acres under crop next season.

CHILDLESS WOMEN

Please Read This Letter And See What Normal Health Will Do For You.

Berwick, Ont.—"I had organic trouble, and after taking Lydia E. Pinkham's Vegetable Compound and Blood Medicine all my troubles passed away. I was made strong and well and have been ever since. Now we have a fine baby boy six months old, and I know that I would not have this baby and would still be suffering if it were not for your remedy. My husband and myself say that your remedies are worth their weight in gold, and I recommend them to all my friends. One of my aunts is taking them now." Mrs. NAPOLEON LAVIGNE, Berwick, Ontario, Canada.

Among the virtues of Lydia E. Pinkham's Vegetable Compound is its ability to correct sterility in many cases. This fact is well established as evidenced by the above letter and hundreds of others we have published in these columns.

In many other homes, once childless, there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound has made women normal, healthy and strong.

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

Lake Windermere Camp

New Resort to be Opened on Shores Of Lovely Lake In Rockies

There will be opened to tourists this summer, a new resort of rustic design in the Canadian Pacific Rockies on the sandy beaches of Lake Windermere, the loveliest warm water mountain lake in British Columbia.

Lake Windermere is situated about 170 miles south of the main line of the Canadian Pacific and is reached from the main line at Golden, the station being Lake Windermere.

The scenery of this region, combining as it does pastoral softness with rugged mountain grandeur, will attract visitors from all parts, and become a favorite playground.

The summer visitor will find here everything that he could wish, bathing, boating, riding on mountain paths to great Canyons and Glaciers, golf, automobilism, fishing and big game hunting in season.

The Canadian Pacific are erecting a number of cabins fully equipped with the conveniences of the modern home, which will be opened July 1st. Community hall for dancing and social recreation.

An auto road from Banff is in the course of construction by the Dominion Parks Board.

How's This?

We offer \$100.00 for any case of catarrh that cannot be cured by HALL'S CATARRH MEDICINE. HALL'S CATARRH MEDICINE is taken internally and acts through the blood on the mucous surface of the system. Sold by druggists for over forty years. Perpetual Free Trial.
F. J. Cheney & Co., Toledo, Ohio.

Cold-Proof House

House Has Been Built to Keep the Cold Out and the Heat In

A house has been built in Saskatchewan on the refrigerator plan, save that whereas a refrigerator keeps the cold in, the house has been built to keep the cold out and the heat in. It has been so successful during the last winter that it may be said to merit the term "cold-proof." The owner is Mr. H. Gauvin, a refrigerator engineer.

The house was built of cement and care was taken that there should be no means whereby the warm air in the house might travel up the walls, and escape through a crack or down the inner surface of the outer wall, and so lose its heat. To this end the walls were so built as to eliminate air pockets of appreciable size. The house had a concrete basement, and here again the builder took care that the cold air would not leak into the house.

It must not be thought that the house was hermetically sealed, for it has 43 windows to the nine rooms. But there are only two entrances, one in the front and one in the rear. During the winter the house was heated throughout by electricity, without undue expense.

New Gold Discovery

Gold has been discovered on Snake Creek, eight miles north of Okotoks, and 20 miles south of Calgary. Prospectors have been flocking to this locality, and many miles of claims have been staked. A sample analyzed by the Calgary city chemist assayed \$18.50 to the cubic yard of sand.

The North Sea takes the drainage of a quarter of Continental Europe besides that of half of the British Isles.

Farm Women's Institutes

The Alberta farm women's institutes are now the second largest in the Dominion, with a membership of more than 13,000. During the year 1919, 32 branches were organized in the province making a total of 265. Activities include classes in cooking, sewing, sociology, child welfare and the undertaking of relief work.

"Goek! How my back aches!"

After a day's "fit" or cold, the kidneys and bladder are often affected—called nephritis, or inflammation of kidneys. This is the red flag of danger—better be wise and check the further inroads of kidney disease by obtaining that wonderful discovery of Dr. Pierce's, known as Amuric (anti-uric-acid), because it expels the uric acid poison from the body and removes those pains, such as backache, rheumatism in muscles and joints.

Naturally when the kidneys are diseased the blood is filled with poisonous waste matter, which settles in the feet, ankles and wrists; or under the eyes in bag-like formations.

Send me, for trial pack, of Amuric to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., or branch Laboratory, Bridgeport, Ont.

FERRISBUR, Ont.—"I was troubled with rheumatism in the right limb and hand for several years, and finally the left shoulder. The only way I could live was on my back. I had great difficulty to sit down and move to get up. Recently I had a very severe pain in my back. I have taken Dr. Pierce's Golden Medical Discovery several times with the most satisfactory results, so I concluded to give him Amuric Tablets a trial. The pain in my back and shoulder had stopped entirely and in right hand it is very slight and getting better. I am able to sit up now or lie in any position I wish without discomfort or pain. I certainly will recommend Amuric to those who suffer from rheumatism. I have tried them all."—GEOFFREY BUCK, Dr. Dicks and Watson.

THE ATLAS GIVES More than just materials

When you let us supply your building needs you get a great deal more than just so many feet of lumber—bundles of shingles—pounds of nails—or panels of Beaver Board.

You get the benefit of our building material knowledge and experience in Service that helps you get the results you want at the right price. Service first in planning the work—more service in selecting proper materials—speedy service in delivering the goods.

You pay for the materials. The service pays for itself in the larger volume of business it brings through super-satisfied customers.

It will pay you to be one of them.

Come to us

Local & General

A Tea will be held at the home of Mrs. Willis on Saturday afternoon, May 22nd, in aid of the Camp-funds of the Pathfinders and Trail Rangers. Twenty cents is the charge. Everybody welcome.

To offset an error in our issue of last week. We print again for the benefit of all concerned, that a special meeting of the Women's Institute will be held in the T. O. F. Hall, on Thursday afternoon, May 27th, to commence at 2.30 p. m. Miss Noble, President of the Provincial Women's Institute, will deliver an address that will interest all women in the district. All are therefore earnestly requested to attend. Tea will be served.

For Sale—Puff Orpington Baby Chick, 35c. each. Hens will be sold if preferred with chickens.

Mrs. E. Richards.

Annual Congregational Social

The Annual Congregational Meeting at the Union Church last Monday night was thoroughly enjoyed by all present. The Pastor acted as Chairman, he reporting that 120 preaching services had been held during the past Church year and over 2,000 miles travelled. Had the weather conditions been normal during the Winter the record would have been much greater. Twenty children were baptized, five funerals conducted and four marriages performed. A fine program was given and splendid reports from the different organizations. The country people were largely missing and, while this was expected owing to the busy season, yet it was regretted that they were unable to attend in larger numbers. A piano solo was given by Miss H. Burslem and brought forth much applause. The report of the Sunday School was given by the Treasurer, Mrs. Jeffery, and the Secretary, Mrs. Reed. It showed a healthy condition in that important institution, the receipts were \$196.00 and the attendance averaged over 32. An interesting development the past year has been the organization of the Girls and Boys. Miss Freda Pullan, President of the Pathfinders, gave a splendid report of that organization. It is conducted by Mrs. McLees and Mrs. Reed. As in the case of the boys organization it deals with the four-fold development intellectually, physically, devotionally and socially. Glenallen Reed, Chief Ranger of the Trail Rangers, told about what the boys were doing. Both the girls and boys are planning to attend camp at Sylvan Lake in July. The Orchestra numbers were well received. At the Sunday Services the Orchestra also renders good service. The solo by Miss M. Richards, entitled "Lincoln's Inn" captivated the audience and in response to an enthusiastic encore she sang "Just Awearin' for You" in a delightful manner. One of the agreeable surprises of the pleasant evening was the appearance of Mrs. McLees as a reader. She gave "De Ship of Faith" in good style and, being encored recited "The Bashful Suitor". The finances of the Circuit were reported by the Secretary-Treasurer, Mr. Jeffery. The Rodney appointment was the banner country appointment financially, having raised the sum of \$300.00. The amount raised by the circuit for all purposes was \$3,100.00 made up as follows:—

Receipts	
Beaver Dam	\$162.35
Bottrell	177.35
Crossfield	873.12
Elba	60.00
Rodney	300.00
Sunshine	155.55
Ladies Aid	475.00
Sunday School	198.00
Forward Movement	631.00
Organized Classes	55.00
Other Sources	25.33
Total	3,100.00

A delightful evening was brought to a close with the Ladies Aid serving refreshments.
